

BENTON

Horizontal Directional Drilling

EXPERIENCE

PRIDE

PERFORMANCE

EXPERIENCE

Benton performs Horizontal Directional Drilling (HDD) of infrastructure for customers in the natural gas, oil, water, fiber optic, and sewer industries.

Our drilling superintendents have years of drilling history. Their expertise has taken them literally around the country and the world.

With bores in North America, and Europe, our drillers have the knowledge and skill to accomplish the drill.

No matter what the soil conditions, Benton's experienced HDD personnel will perform your bore. With our experience in rock formations, we complete what we start.

PRIDE

Over the years, Benton has gained a reputation for having the capabilities to handle any type of installation regardless of the level of sophistication. This reputation is a direct reflection of our employees. They are our number one asset and it shows in their commitment to getting the job done safely and right. Our employees are focused on providing quality services, while completing your bores safely, timely, and without leaving an environmental footprint.

The employees of Benton stand ready for the opportunity to not only meet your needs, but to exceed your expectations.

PERFORMANCE

When it comes to performance, it pays to have the right personnel with the right equipment to complete the bore.

HDD Rigs w/Mud Systems

Benton has over (30) Horizontal Directional Drilling rigs at our disposal. With capacities up to 200,000# of pullback thrust, we have the equipment to meet your boring needs.
